November 2020

DESY Summer Student Program 2020

I would like to draw your attention to the DESY Summer Student Program 2020 at our laboratory. DESY is one of the world's leading research centers in photon science, particle and astroparticle physics and accelerator science.

With this program we give young students an excellent opportunity to gain first-hand research experience during a period of eight weeks in our research groups, complemented by topical lectures. The DESY Summer Student Program is targeted towards physics students mainly, on a level adequate to six semesters of study and beyond.

The program is highly international, more than half of the students are coming from non-German universities.

The program will take place from July 21 till September 10, 2020, at our two laboratory sites in Hamburg and Zeuthen. Deadline for applications is January 31, 2020. For further details please see www.desy.de/summerstudents.

I would like to kindly ask you to inform your students about this exciting program. A poster for display is attached. Thank you for your cooperation.

With best regards

Prof. Dr. Dr. h.c. Helmut Dosch
